

AIR MONITORING:
EPA conducted handheld air monitoring on April 23, 2019 from 00:00 to 23:59 at 93 locations in the surrounding communities. Results were reported below the detection limit at all locations for total volatile organic compounds (VOCs). EPA will continue to conduct additional air monitoring, and the Trace Atmospheric Gas Analyzer (TAGA) also continues air sampling in local communities.

SURFACE WATER SAMPLES:
EPA conducted surface water sampling on April 23, 2019 at 8 sample locations. The surface water samples were collected along Buffalo Bayou and the San Jacinto River and will be analyzed for per- and polyfluoroalkyl substances (PFAS), volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), chemical oxygen demand (COD), and oil and grease. The results from the sampling event will be compared to the TCEQ Surface Water Quality Standards (WQS), or to TCEQ Texas Risk Reduction Program surface water protective concentration levels (PCLs), if a WQS is not available for a chemical. No exceedances have been observed since April 2, 2019.
